SKILLS React, Redux, Ruby, Ruby on Rails, Javascript, jQuery, SQL, Git, HTML5, CSS3

PROJECTS

FermentSite (Rails, React, Redux HTML5, AWS and CSS3)

[Live Site](#) | [Github](#)

A fullstack single-page Eventbrite clone where users can browse events, create events with photos and descriptions, and RSVP to events they will attend

- Integrated dynamic react components with back-end Rails data using JQuery ajax requests and set React state to render data based on user input
- Utilized Amazon Web Services S3 (AWS) to store images for quicker uploading times
- Maintained DRY code through ActiveRecord's polymorphic associations, creating cleaner code and reducing errors

Busy Bee (MongoDB, Express, React, Nodejs)

[Live Site](#) | [Github](#)

A fullstack single-page app that solves user routing issues via Google map API, dynamically rendering fastest routes between multiple input points.

- Ensured data integrity through Validator.js to control what user input gets saved to MongoDB database
- Leveraged CSS flexbox strategy and media queries to create dynamic and streamlined layout
- Incorporated Google Map API to provide dynamic responsiveness to embedded map

EscapeHatch (Javascript, HTML, CSS)

[Live Site](#) | [Github](#)

A fullstack single-page point-and-click adventure game, where the user moves around the canvas screen to collect inventory and beat the timer.

- Employed event listeners to manipulate HTML elements with CSS styling tags according to user input
- Called requestAnimationFrame method to allow for sprite movement on canvases, for an immersive User Experience
- Activated win/loss game scenarios based on setInterval and clearInterval timers

EXPERIENCE

Modern Times Market Manager San Francisco, CA

July 2017-February 2020

- Grew overall accounts distribution an average of 6.1% through outreach, cold calls, and existing account management, covering a territory of 300 miles
